COMMUNITY NEWS AND MAINTENANCE TIPS

Thanksgiving Office Closure Reminder
Our office will be closed on Thursday, November 26, in observance of Thanksgiving.
We will reopen and resume regular business hours on Friday, November 27.

A SEASON OF GRATITUDE AT OHANA NAVY!

As November arrives, we're reminded of the many reasons we have to be thankful. Most importantly, we are grateful for the residents who make Ohana Navy a welcoming and vibrant community.

Abandoned Vehicle Removal Initiative
We are pleased to share that we have partnered with **Dad's Towing** to assist with the removal of abandoned and unauthorized vehicles throughout our communities. This initiative is part of our ongoing efforts to enhance the appearance, safety, and overall quality of our neighborhoods.

To keep residents informed, new signage identifying the towing provider will be installed throughout the community. Due to the number of vehicles requiring attention, removals will occur in phases and may take some time to complete.

We appreciate your patience and cooperation as we work to create cleaner, more attractive communities for everyone to enjoy. Thank you for helping us maintain a welcoming place to call home.

Maintenance Tip: Change Your A/C Filter Every 90 Days
A clean HVAC filter is one of the easiest ways to keep your home comfortable and your heating and cooling system operating efficiently. To help maintain proper airflow and indoor air quality, residents are encouraged to replace their A/C filter every 90 days.

Why Is Filter Replacement Important?

- Improves indoor air quality by reducing dust, allergens, and airborne particles.
- Promotes better airflow and overall system performance.
- Helps your HVAC system operate more efficiently, which may reduce energy consumption.
- Reduces wear and tear on equipment, helping prevent unnecessary maintenance issues.
- Minimizes dust buildup throughout your home.

While changing your filter, take a moment to inspect the area around your HVAC unit for **any signs of water leaks, moisture, condensation, unusual odors, or excessive dust buildup.** Identifying these issues early can help prevent more extensive damage and keep your system operating efficiently. If you notice anything concerning, please submit a maintenance request promptly so our team can address the issue as quickly as possible.

Free HVAC filters are available for **all filter sizes** at the following locations:

- Main Maintenance Shop
- RSO Office
- PMRF Maintenance Office

Please bring a valid photo ID and your housing address to pick up free filters at any of the locations mentioned above.
